

# ZANUSSI

ELECTRIC

OVEN AND

GRILL

ZCE 7350

INSTRUCTION BOOKLET

## TECHNICAL DETAILS

**MODEL NO.      ZCE 7350**

Voltage:            230/240 Volts AC 50 Hz

Wattage:            11.9/13.0kW

Height:            900mm

Width:            500mm

Depth:            600mm

This appliance complies with: European Council Directive 73/23/EEC.  
EMC Directive 89/336/EEC.  
CE Marking Directive 93/68/EEC.

## PREFACE

Dear Customer,

Thank you for buying a Zanussi cooker. With our experience in developing and manufacturing the very best in U.K. cookers, you can be assured that you have purchased a hard working, reliable, quality product.

Zanussi cookers comply with British Standard safety and performance requirements. They have been approved by BEAB (British Electrotechnical Approvals Board) and are covered by a 12 month parts and labour guarantee.

To get the best from your new Zanussi cooker, we ask that you PLEASE READ THESE INSTRUCTIONS CAREFULLY. Particular attention should be made to cooking times and temperatures which may differ from your previous cooker.

It is most important that this instruction book is retained with the appliance for future reference. Should the appliance be sold, or if you move house and leave the appliance, always ensure that the book remains with the appliance. This will enable the new owner to be acquainted with the functioning of the appliance and the relevant warnings.

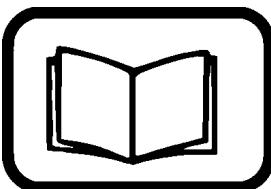

Please read the whole instruction book before attempting to use the appliance ensuring you follow the recommendations given.

## SAFETY

THESE WARNINGS ARE PROVIDED IN THE INTERESTS OF YOUR SAFETY. ENSURE THAT YOU UNDERSTAND THEM ALL BEFORE INSTALLING OR USING THE COOKER.

PLEASE  
READ  
CAREFULLY

### BEFORE INSTALLATION

This cooker is heavy and care **must** be taken when moving it.

**Ensure** that all packaging, both inside and outside the cooker has been removed before the appliance is used.

**Do not** try to move the cooker by pulling the door handles.

**It is dangerous** to alter or modify the specifications of the cooker in any way.

After installation, please dispose of the packaging with due regard to safety and the environment.

### DURING OPERATION

**Do not** use this cooker if it is in contact with water. **Never** operate it with wet hands.

This cooker is designed to be operated by adults. Young children **must not** be allowed to tamper with the cooker or play with the controls.

Accessible parts especially around the grill area may become hot when the cooker is in use. Children should be **kept away** until it has cooled.

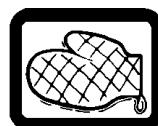

**Take great care** when heating fats and oils as they will ignite if they become too hot.

This cooker has been designed for cooking edible foodstuffs only, and **must not** be used for any other purposes.

**Ensure** cooking utensils are large enough to contain foods to prevent spillages and boil overs.

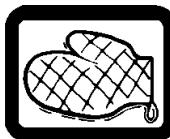

The handles of saucepans which are smaller than the heated area on the hob will become hot. **Ensure** your hand is protected before handling the pan.

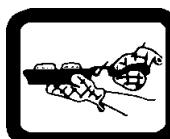

**Take care** to follow the recommendations given for tending the food when grilling.

**Do not** leave the grill pan handle in position when grilling as it will become hot.

**Always** use oven gloves to remove and replace the grill pan handle when grilling. Recommendations given on page 15.

**Ensure** that you support the grill pan when it is in the withdrawn or partially withdrawn position.

**Ensure** that all vents are left unobstructed to ensure ventilation of the oven.

**Ensure** that the anti-tilt shelves are put in place correctly. Refer to instructions on page 18.

**Never** line any part of the cooker with aluminium foil.

**Always** stand back from the cooker when opening the oven door to allow any build up of steam or heat to release.

**Do not** place sealed cans or aerosols inside the oven. They may explode if they are heated.

**Do not** leave the hotplates switched ON for long periods when not covered by a saucepan. The controls and cabinets may overheat.

## AFTER USE

**Ensure** that all control knobs are in the OFF position when not in use.

For hygiene and safety reasons this cooker should be kept clean at all times. A build-up of fats or other foodstuffs could result in a fire, especially in the grill pan.

**Do not** leave utensils containing foodstuffs, e.g. fat or oil in or on the cooker in case it is inadvertently switched ON.

Cookers and hobs become **very hot**, and retain their heat for a long period of time after use. Children should be kept well away from the cooker until it has cooled.

## GENERAL

**Under no circumstances** should repairs be carried out by inexperienced persons as this may cause injury or serious malfunction. This cooker should be serviced by an authorised Service Engineer and only genuine approved spare parts should be used.

**Do not** stand on the cooker or on the open oven door.

**Do not** hang towels, dishcloths or clothes from the cooker or its handle. They are a safety hazard.

Only clean this cooker in accordance with the instructions given in this book.

Your safety is of paramount importance.

Therefore, if you are unsure about any of the meanings of these **WARNINGS** contact the:

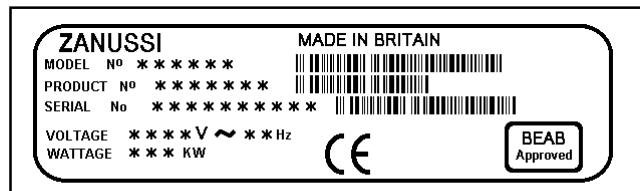

Customer Care Department  
Telephone (01635) 521313

## INTRODUCTION

### WARNING: THIS COOKER MUST BE EARTHED

#### RATING PLATE

Record the model, product and serial numbers on the back cover from the rating plate. This is situated on the lower front frame of the cooker and can be seen upon opening the fan oven door.

The cooker must be protected by a suitably rated fuse or circuit breaker. The rating of the cooker is given on the rating plate.

#### INSTALLATION

If your cooker has been damaged in transit, contact your supplier immediately. **DO NOT** attempt to install it.

Your cooker left the factory fully packaged to protect it from damage. If it is delivered without packaging and damage has occurred, the manufacturer cannot accept responsibility. Contact your supplier for advice.

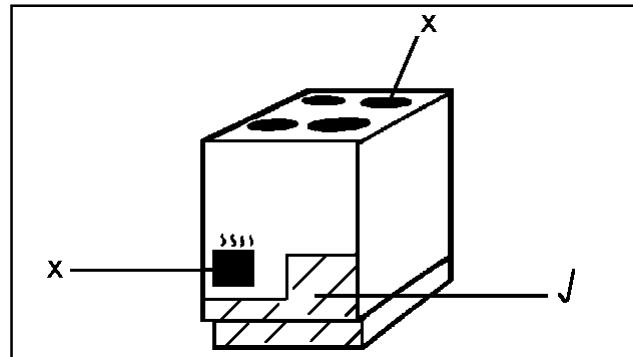

Once the packaging has been removed the cooker should only be moved by hand. **DO NOT** use a sack barrow or any other aid to lift the cooker as damage may occur.

Connection to the electricity supply must be carried out by a qualified electrician/competent person.

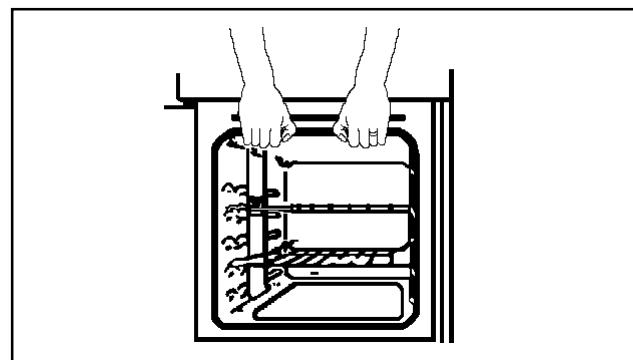

The electrical connection should be made using a double pole isolating switch (cooker socket) with at least 3mm contact separation. The cable must have conductors of sufficiently high cross-sectional area to prevent overheating and deterioration.

Six square millimetres (6.00mm<sup>2</sup>) is the recommended cross-section area.

The cable should be routed away from potentially hot areas marked by X in the diagram below.

To move the cooker, open the fan oven door, and lift the cooker by holding inside the top of the compartment.

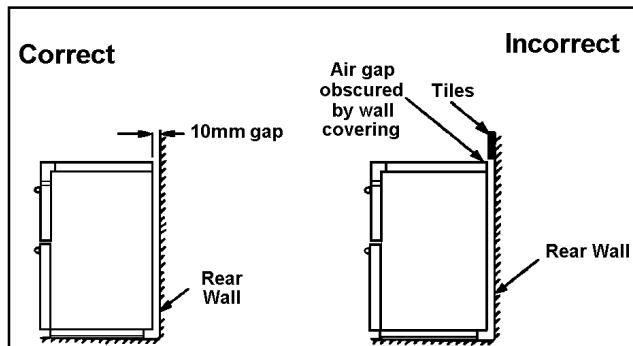

This is a type X appliance which means it is free-standing and can be fitted with cabinets on one or both sides. It may also be fitted in a corner setting.

Ensure that the cooker is standing level.

Side walls which are above hob level should be protected by heat resistant non-combustible material and **MUST NOT** be nearer than 40mm to the hob side.

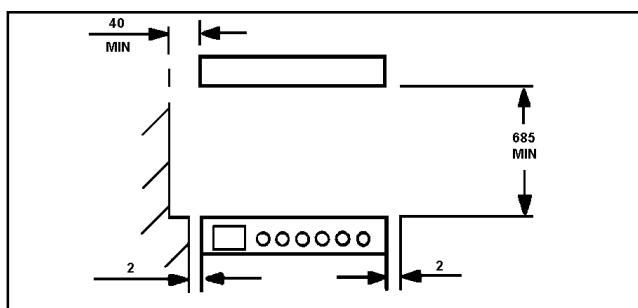

A nominal air gap of 2mm all around the cooker is required to enable the cooker to be moved into position. It is recommended that proprietary trims are fitted to protect the worktops of either side of the appliance. These are available from most DIY stores.

Two spacers have been incorporated into the back of the appliance to ensure an air gap of 10mm is maintained at hotplate level. Tiles or other forms of deep wall covering should not obscure this gap.

Note: Vapours from the oven vent may in time cause discolouration of wallcoverings behind the cooker. For ease of cleaning it may be preferable to tile behind the cooker.

Overhanging surfaces or a cooker hood should be a minimum of 685mm above the hob.

It is important to ensure that the appliance is level after installation. Levelling feet are fitted to the front of the appliance to accommodate uneven floors.

## REVERSIBLE MAIN OVEN DOOR

If you require the oven door to be hinged on the opposite side, you will need to contact a qualified Service Engineer. Please note that a charge will be made. See the enclosed Customer Care Booklet.

## GENERAL NOTES ON USING YOUR COOKER

We suggest that you run the oven elements for 10 - 15 minutes at 220°C to burn off any residue from their surfaces.

The procedure should be repeated with the grill for approximately 5 - 10 minutes.

During this period an odour may be emitted, it is therefore advisable to open a window for ventilation.

## OVEN INDICATOR NEON

The light will indicate whether the oven is switched on, the neon also indicates when the set temperature has been reached. The neon will cycle on and off during use to show that the temperature is being maintained.

## THE COOLING FAN FOR THE CONTROLS

The cooling fan will always come on when the grill is switched on. If it is only used for a short period of time the fan will switch off when the controls are turned off. If the grill is used for a longer period of time the fan will run on depending on the temperature, and may cycle on and off until the cooker has cooled.

In the case of the main oven the cooling fan may not switch on except when used for a longer period of time. The cooling fan may run on, and cycle on and off after the cooling knobs have been switched off, until the cooker has cooled. Do not switch the cooker off at its power point until the fan has cooled the cooker down.

## ABOUT CONDENSATION AND STEAM

When food is heated it produces steam similar to a boiling kettle. The ovens are vented to allow some of this steam to escape. However, always stand back from the cooker when opening the oven door to allow any build up of steam or heat to release.

If the steam comes into contact with a cool surface on the outside of the cooker, e.g. a trim, it will condense and produce water droplets. This is quite normal and is not caused by a fault on the appliance.

To prevent discolouration, regularly wipe away condensation and also soilage from surfaces.

## GRILL AND OVEN FURNITURE

The following items of grill and oven furniture have been supplied with the cooker.

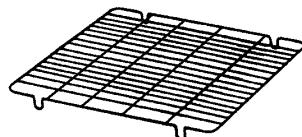

1 grill pan

1 grill pan handle

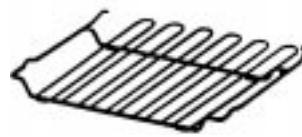

1 grill pan grid

1 grill deflector

1 cranked shelf  
for grilling only

2 straight shelves  
for main oven cooking

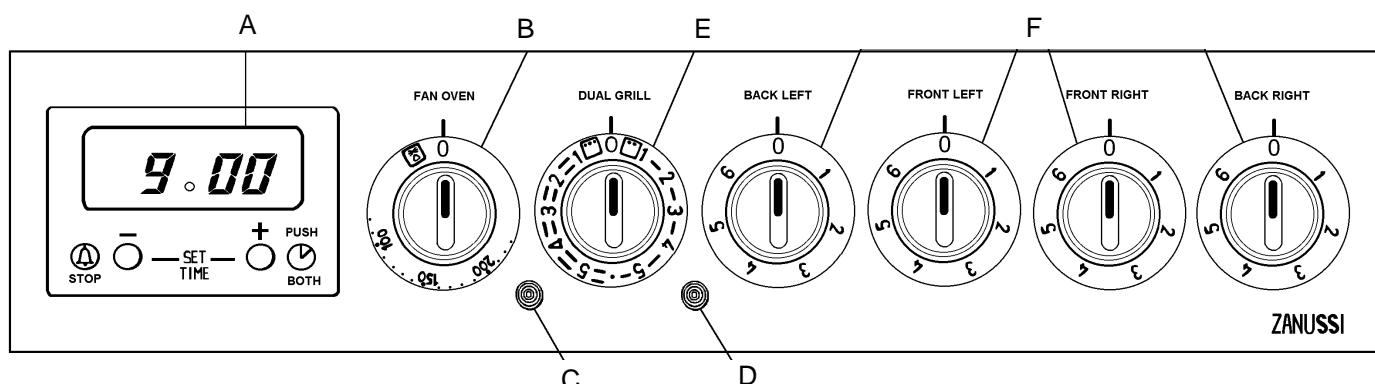

The grill deflector sits above the grill element and prevents fat splashing onto the grill roof.

The deflector may be easily removed for cleaning.

## GETTING TO KNOW YOUR COOKER

### THE CONTROL PANEL

### FEATURES

A	-	Timer
B	-	Fan Oven Control
C	-	Fan Oven Indicator Neon
D	-	Dual Grill Control
E	-	Dual Grill Indicator Neon
F	-	Hotplate Controls

# ELECTRONIC MINUTE MINDER

1 = (-) DECREASE CONTROL & MINUTE MINDER SETTING BUTTON

2 = (+) INCREASE CONTROL

( ) COOKPOT SYMBOL

( ) PUSH BOTH CLOCK SETTING SYMBOL

( ) MINUTE MINDER SYMBOL

The electronic minute minder can indicate the time of day, operate as a minute minder and it can be used to time and switch off the oven.

## 1. SET THE TIME OF DAY

When the electricity supply is first switched ON, the display will flash 0.00. See Fig. 1.

Press buttons (1) and (2) together. The display will momentarily read 88.88. See Fig. 2. Release buttons, 0.00 will appear in the display as Fig. 3. **Within 5 seconds** press button 2, 12.00 will show in the display as Fig. 4.

**Within 5 seconds** press and hold either button (1) to decrease or button (2) to increase the time until the correct time of day on the 24 hour clock is reached, e.g.14.30. See Fig. 5.

**Note: The increase and decrease control buttons operate slowly at first, and then more rapidly. They should be pressed separately.**

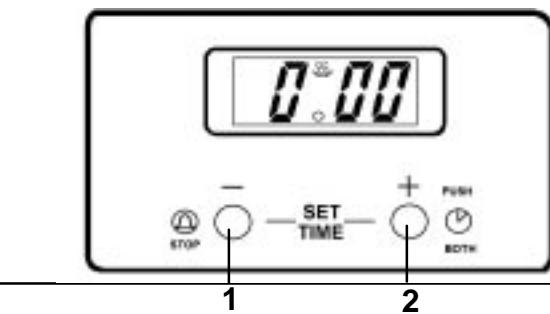

Fig.1

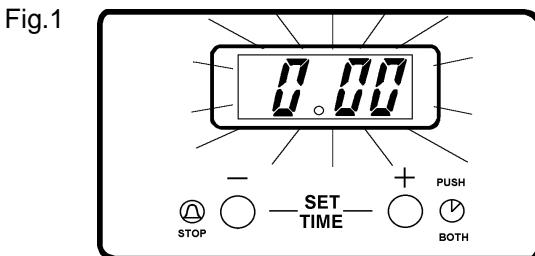

Fig.2

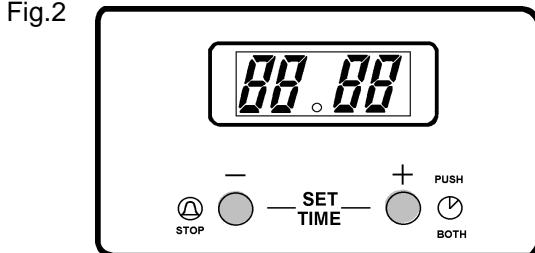

Fig.3

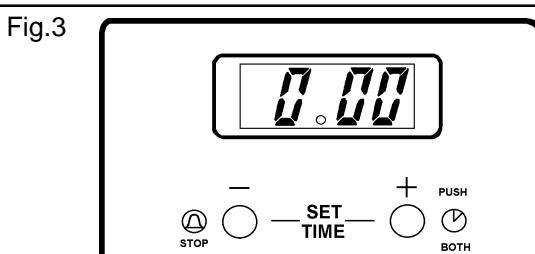

Fig.4

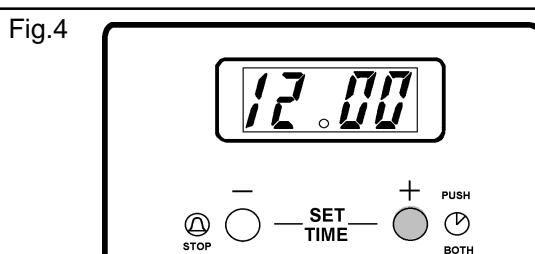

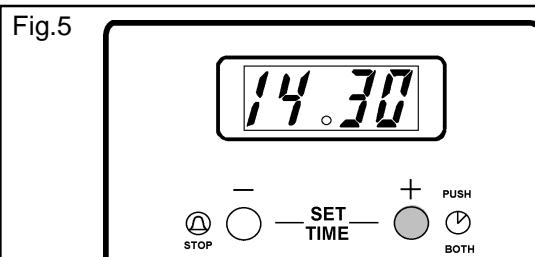

Fig.5

## 2. THE MINUTE MINDER

### IMPORTANT

The minute minder can be used to time a set cooking period. At the end of the cook time the minute minder will automatically switch off the oven if in use.

The minute minder gives an audible reminder at the end of any period of cooking up to 23 hours and 59 minutes.

To set press button (1) and the display will read 0.00, see Fig. 6.

Release button (1) and press and hold button (2). The display will count up in one minute intervals until the interval to be timed is reached e.g. 30 minutes, see Fig. 7. If necessary press and hold button (1) to achieve the correct time interval.

The minute minder will begin to count down once set. At the end of the timed period the minute minder will click, switching the oven OFF if in use.

An audible signal will sound for up to 2 minutes. The cookpot symbol will flash and the time of day will show in the display. See Fig. 8.

To stop the sound press button (1). The display will stop flashing and show the time of day, e.g. 15.00. The cookpot symbol (  ) will go out, see Fig. 9. If using the oven it will come on again once button (1) has been depressed. When cooking is complete remove food and turn OFF oven temperature control.

### 3. TO CANCEL THE MINUTE MINDER

Press and release button (1). Press and hold button 1 and the display will count down in one minute intervals to 0.00. See Fig 10. Release button (1).

After a few seconds the cookpot symbol will flash and the time of day will show in the display. See Fig. 11.

If the oven is in use this will switch OFF after a few seconds.

To reset, press buttons (1) and (2) together. See Fig. 12.

### 4. THINGS TO NOTE

1. The time of day must be set before the oven will operate. There will be a few seconds delay before the oven switches on.
2. The minute minder function controls the oven only and will switch the oven OFF at the end of a timed period. This function is useful if you want to begin cooking now and have the oven switch OFF automatically.
3. If you have used the minute minder to time food cooking in the oven you will need to reset the timer by pushing both buttons before the oven can operate again.

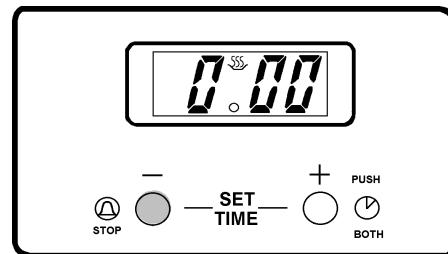

Fig.7

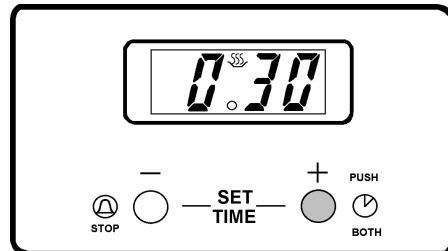

Fig.8

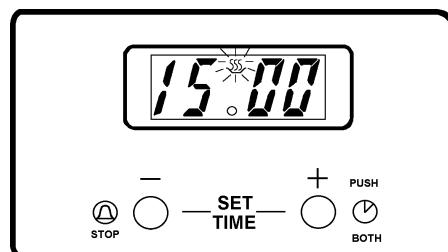

Fig.9

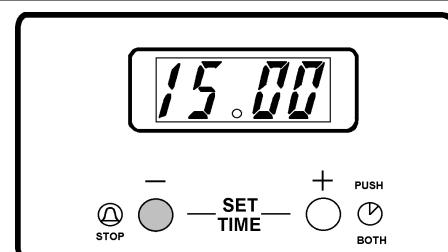

Fig.10

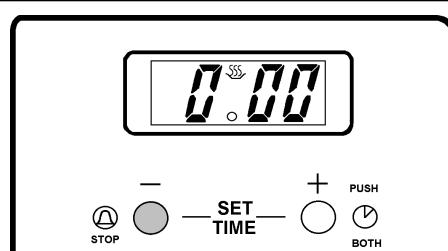

Fig.11

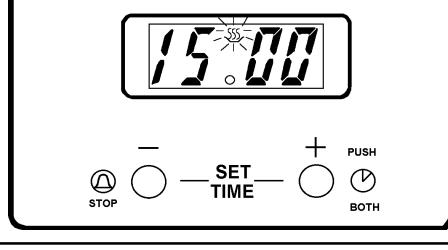

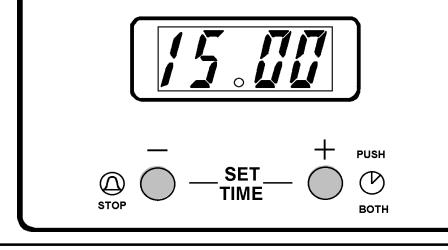

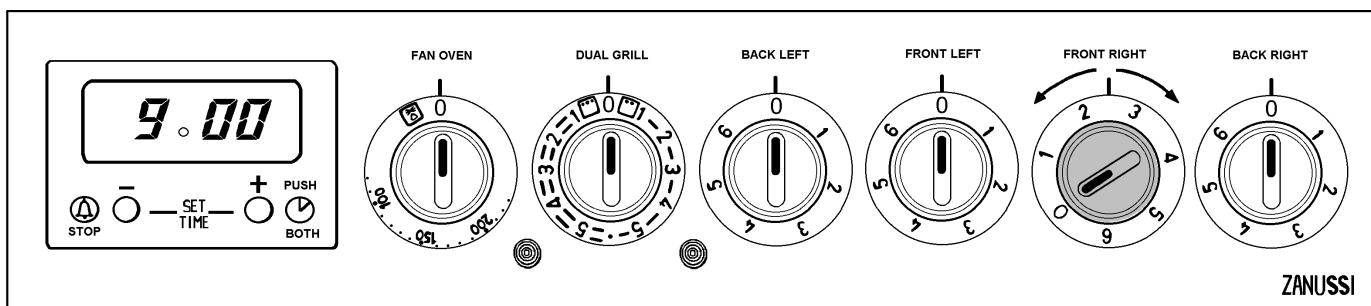

Fig.12

## THE SEALED HOTPLATES

### BEFORE USING THE HOTPLATES FOR THE FIRST TIME

Turn the control knob to a medium/high setting and allow the hotplate to heat uncovered by a saucepan for 3-5 minutes. This hardens the protective coating on the hotplates and makes it more resistant to normal use. A harmless smoke will be given off from the hotplates.

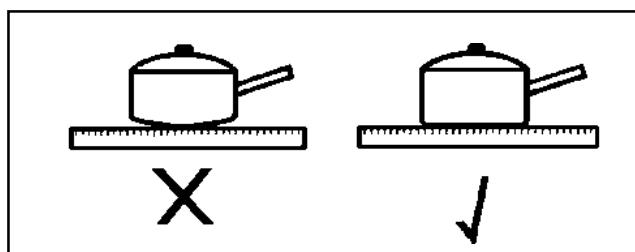

- To operate the hotplates turn the control knobs in either direction to vary the heat setting.
- The highest number represents the hottest setting and the lowest represents the coolest setting. Choose a setting appropriate to the quantity and type of food to be cooked.

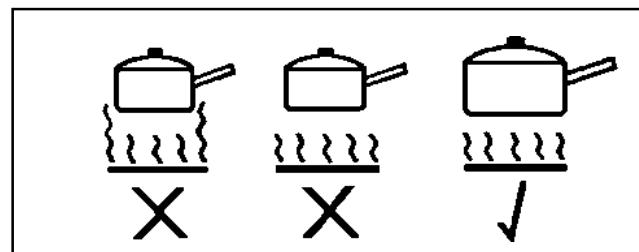

### RECOMMENDED SAUCEPANS

For speed and economy only good quality saucepans with flat bases and close fitting lids are recommended.

To check the flatness of the saucepan place a ruler across the pan base, hold at eye level and look for light showing. There should be very little or no light visible between the ruler and the pan base.

The size of the base of the saucepan should be the same or up to 3cm/1 inch larger than the hotplate. If the base is too small energy will be wasted, boilovers will also be more difficult to deal with as spillage will fall directly onto the hotplate.

**Pressure cookers, preserving pans etc.,** should comply with the recommendations given above.

Traditional round bottomed Woks **must not** be used even with a stand. Woks with flat-bottomed bases are available and do comply with the above recommendations.

### HINTS AND TIPS

- Avoid the use of decorative covers as they can cause condensation to form on the hotplates which may lead to deterioration.
- Follow any guidelines provided by the saucepan manufacturer, particularly those relating to recommended heat settings.
- Avoid using thin, badly dented or distorted saucepans as they can lead to sticking and burning of food.
- To prolong the life of the hotplates:
  - Never use utensils with a skirt, e.g. a bucket
  - Never use an asbestos mat

## DEEP FAT FRYING

### SPECIAL FRYING NOTE:

For safety purposes when deep fat frying, fill the pan one-third full of oil, DO NOT cover the pan with a lid and DO NOT leave the pan unattended. In the unfortunate event of a fire, switch the cooker OFF at the electricity supply and cover the pan with a lid or damp cloth to assist in smothering the flames.

DO NOT use water on the fire. Leave the pan to cool for at least 30 minutes before moving it.

DO NOT leave the fat or oil in the frying pan on the hob to store it in case the hob is inadvertently switched ON.

#### 1. Preparing the food

Seal the food by coating with flour, egg and breadcrumbs or batter. **Do not** use a basket with batter coated foods as they will stick.

#### 2. Amount of oil

For safety purposes fill the pan only one-third full of oil.

#### 3. Testing the temperature of the oil

It is advisable to use a thermometer to test the temperature of the oil. Alternatively, drop a small cube of bread into the oil which should brown in just under a minute if the oil is at the correct temperature of 190°C/375°F.

#### 4. Cooking the food

Lower the food gently into the oil. **Do not** add too much food at once or the temperature of the oil will be reduced and may result in soggy, greasy food.

Turn the food if necessary; doughnuts float to the surface so will not brown on the upperside if not turned. Once cooked, drain the food on absorbent paper.

#### 5. Double frying chips

Double frying will ensure good chips. First fry the chips for a few minutes at 170°C/340°F to seal the outside. Remove the chips from the oil. Increase the temperature of the oil to 190°C/375°F to finish cooking and brown the chips.

Chips may be kept for several hours after the first frying before finishing off with the second frying.

#### 6. Frying temperatures

	Celsius Scale (°C)	Fahrenheit Scale (°F)
	150	300
First frying of potatoes	<b>170</b>	<b>340</b>
	175	350
	180	360
Second frying of potatoes	<b>190</b>	<b>375</b>
Frying chicken and fish	195	380
	200	390

## PRESERVING

1. DO NOT use a pan that overlaps the perimeter of the hob trim.
2. To allow for a full rolling boil, the pan should be no more than one third full when all the ingredients have been added. It is better to use two pans rather than overfill one, or use half quantities.
3. Use firm fruit or vegetables and wash well before using.
4. Preserving sugar gives clear jam, however granulated sugar is cheaper and gives equally good flavour.
5. Crystallization may be caused if sugar is not completely dissolved before bringing jam to the boil. Over boiling will affect the flavour, setting properties and colour of the jam.
6. To test jam for setting:

If a jam thermometer is available, boil jam to 104°C. Marmalade should be boiled to 106°C.

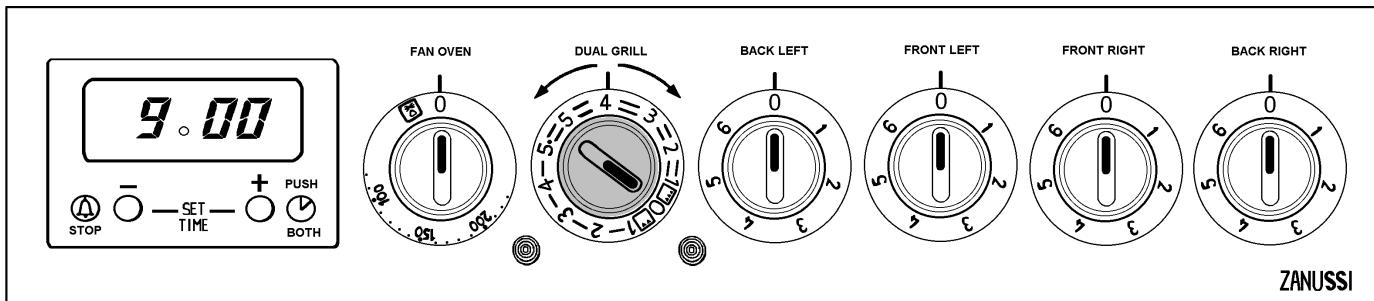

If a jam thermometer is not available, remove pan from heat, place sample of jam on a cold dish and cool quickly (i.e. in a freezer or frozen food storage compartment of a refrigerator). When cold, it will crinkle and hold the mark of a finger run through it, if it is at setting point.
7. The scum should be removed as soon as possible from the surface of the preserve after setting point has been reached. Marmalade should be allowed to cool before potting to prevent the peel rising.

# THE GRILL

## USES OF THE GRILL

**CAUTION - ACCESSIBLE PARTS MAY BECOME HOT WHEN THE GRILL IS IN USE. CHILDREN SHOULD BE KEPT AWAY.**

## SELECTING THE GRILL

- To operate the grill open the grill door and turn the grill control clockwise for full area grilling and anti-clockwise for centre section grilling only.
- The highest number represents the hottest setting and the lowest the coolest setting.

## THINGS TO NOTE

THE GRILL DOOR MUST BE LEFT OPEN DURING GRILLING.

Closing the grill door will cut OFF the power to the grill element preventing incorrect use.

The cranked shelf **MUST** only be used in the grill compartment.

Some smoke from fat splashes may be evident as the grill cleans itself.

The cooling fan will operate in conjunction with the grill. For more details see the operation of the cooling fan, see page 9.

The grill neon will illuminate and cycle on and off during cooking.

## THE GRILL PAN AND HANDLE

The grill pan is supplied with a removable handle.

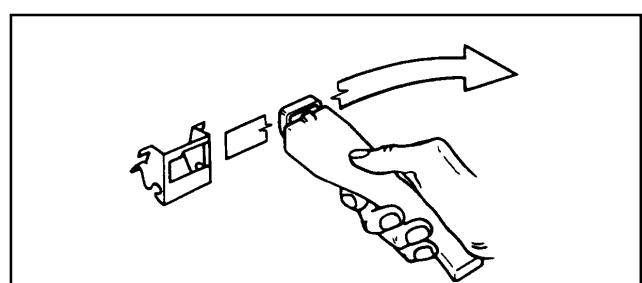

To insert the handle, press the button on the handle with the thumb and pivot the handle slightly upwards inserting the lip into widest part of the bracket. Move the handle towards the left, lower into position and release the button.

**Ensure the handle is positively located.**

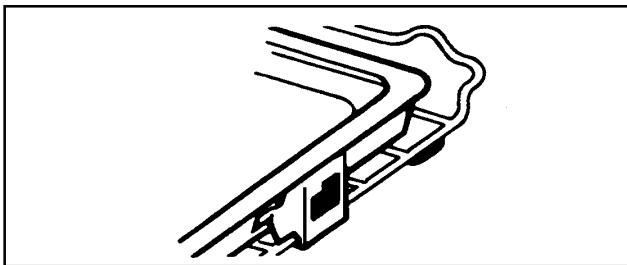

When removing the handle, press the button on the handle with the thumb and pivot the handle slightly upwards and towards the right to remove from the bracket.

**Ensure your hand is protected when removing the grill pan handle as the grill element can become very hot.**

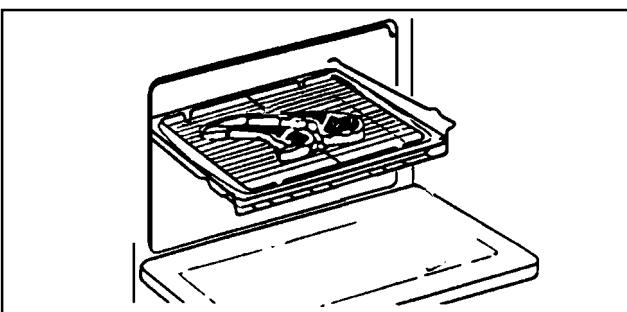

**ALWAYS REMOVE THE GRILL PAN HANDLE DURING GRILLING.**

To correctly locate the grill pan on the shelf, ensure that the cut out on the underside of the handle bracket locates over the front bar of the shelf.

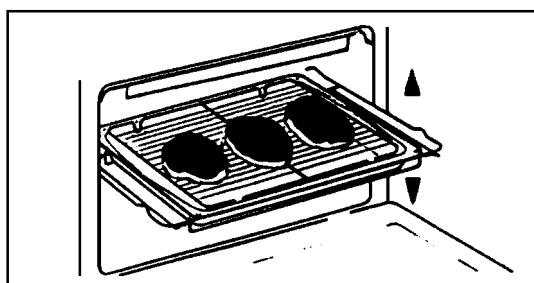

To check the progress of the food being grilled, the grill pan should be withdrawn on the shelf to attend to food during cooking or the carrier shelf can be lifted away from the cooker and rested on a heat resistant work surface.

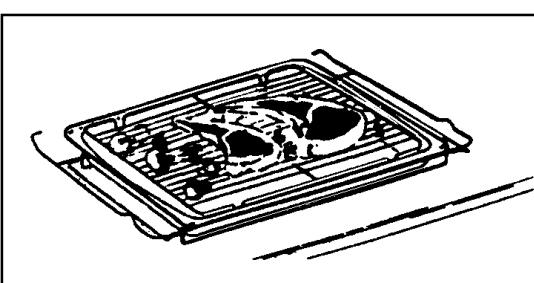

## HINTS AND TIPS

- Food should be thoroughly dried before grilling to minimise splashing. Brush lean meats and fish lightly with a little oil or melted butter to keep them moist during cooking.
- Adjust the grill pan runner position to allow for different heights of food.

- Accompaniments such as tomatoes and mushrooms may be placed underneath the grid when grilling meats.

- When toasting bread use the cranked shelf in position 2 with the grid in the high position.

- Preheat the grill on a full setting for a few minutes before sealing steaks or toasting. Adjust the heat setting and the shelf as necessary during cooking.
- The food should be turned over during cooking as required.

## GRILLING CHART

FOOD	SHELF	GRILL TIME (mins)
Bacon Rashers	2 crk.	2-3 each side
Beefburgers	2 crk.	6-10 each side
Chicken Joints	2 crk.	15-20 each side
Chops - Lamb Pork	2 crk. 2 crk.	7-10 each side 10-15 each side
Fish - Whole Trout/Mackerel	2 crk.	8-12 each side
Fillets - Plaice/Cod	2 crk.	4-6 each side
Kebabs	2 crk.	10-15 each side
Kidneys - Lamb/Pig	2 crk.	4-6 each side
Liver - Lamb/Pig	2 crk.	5-10 each side
Sausages	2 crk.	10-15 each side
Steaks - Rare Medium Well Done	2 crk. 2 crk. 2 crk.	3-6 each side 6-8 each side 7-10 each side
Toasted Sandwiches	2 crk.	1½-1½ each side

crk. = cranked shelf

Shelf positions are counted from the bottom upwards.

The times quoted above are given as a guide and should be adjusted to suit personal taste.

## THE FAN OVEN

### USES OF THE FAN OVEN

#### PREHEATING

The fan oven quickly reaches its temperature, so it is not usually necessary to preheat the oven. Without preheating however, you may find you need to add an extra 5 - 10 minutes on the recommended cooking times. For recipes needing high temperatures, e.g. bread, pastries, scones, soufflés etc., best results are achieved if the oven is preheated first.

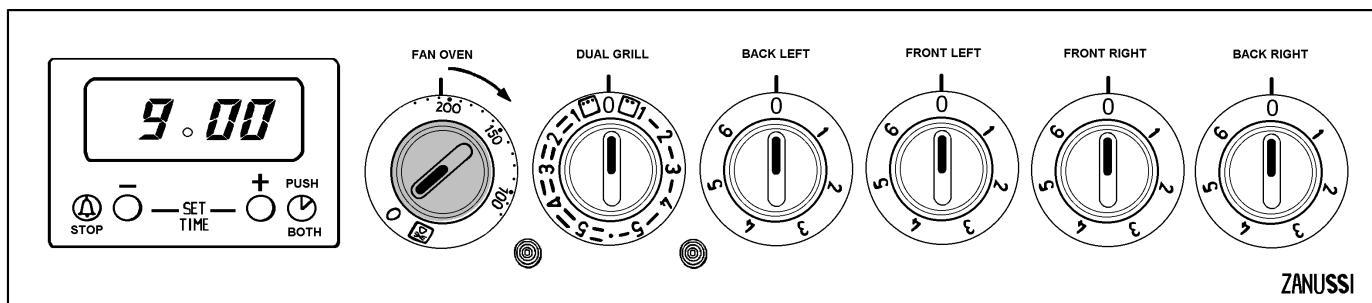

#### COOKING TEMPERATURES

Fan oven cooking generally requires lower temperatures than conventional cooking. Follow the temperatures recommended in the chart on page 19. As a guide reduce temperatures by about 20°C - 25°C for your own recipes.

#### BATCH BAKING

The fan oven cooks evenly on both shelf levels, especially useful when batch baking.

#### SELECTING THE FAN OVEN

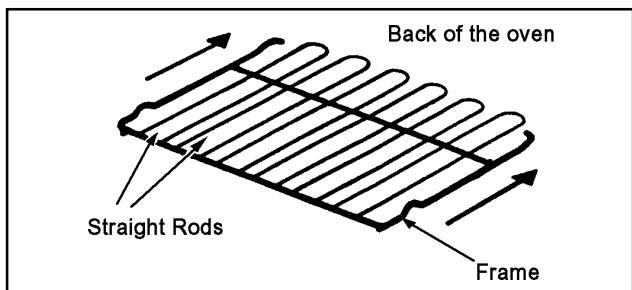

- Turn the fan oven temperature control to the required setting.

#### THINGS TO NOTE

1. The main oven neon indicator will glow until the oven has reached the desired temperature and then go out. It will cycle ON and OFF periodically during cooking showing that the temperature is being maintained.
2. The cooling fan for the controls may switch in after a time. See page 9 for more details on the operation of the cooling fan.

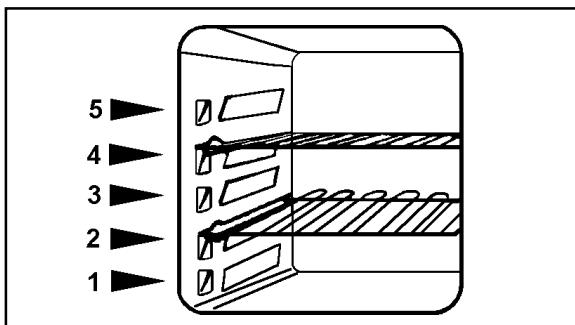

## TO FIT THE OVEN SHELVES

The shelves should be fitted with the straight rods uppermost on the frame and the forms towards the back of the oven. If not fitted correctly the anti-tilt and safety stop mechanism will be affected.

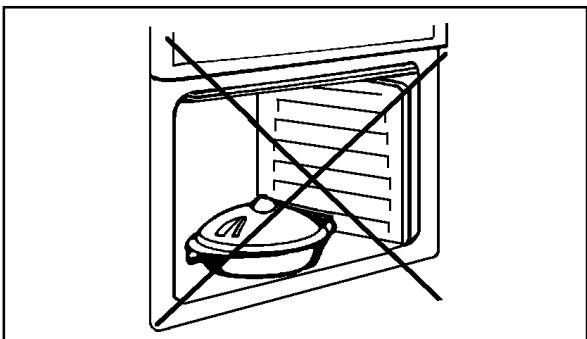

## HINTS AND TIPS

- Arrange the shelves in the required positions before switching the oven ON. Shelves are numbered from the bottom upwards.

- When cooking more than one dish in the fan oven, place dishes centrally on different shelves rather than cluster several dishes on one shelf, this will allow the heat to circulate freely for the best cooking results.
- If it is unavoidable that several dishes are placed on the shelves, for your safety DO NOT withdraw the shelf when removing food or dishes from the oven.
- When batch baking one type of food e.g. Victoria sandwich cakes, those of similar size will be cooked in the same time.
- It is recommended that when baking larger quantities, the shelf positions should be evenly spaced to suit the load being cooked. A slight increase in cooking time may be necessary.

- DO NOT place baking trays directly on the oven floor as it interferes with the oven air circulation and can lead to base burning; use the lower shelf position. However, non-critical dishes/foods may be placed on the base of the oven when additional space is required.

- The use of excessively high temperatures can cause uneven browning. It may be necessary to reduce temperatures slightly. Refer to the recommendations given in the oven cooking chart on page 19.
- DO NOT use the cranked shelf from the grill in the oven.

## FAN OVEN COOKING CHART

The oven temperatures are intended as a guide only. It may be necessary to increase or decrease the temperature by 10° C to suit individual preferences and requirements.

		FAN OVEN		
FOOD		SHELF POSITION	COOKING TEMP °C	APPROX. COOK TIME
Biscuits			180-190	10 - 20
Bread			200-220	25 - 30
Bread rolls/buns			200-220	15 - 20
Cakes:	Small & Queen	Shelf	160-170	18 - 25
	Sponges		160-170	18 - 20
	Victoria Sandwich		160-170	18 - 25

## ROASTING CHART

ROASTING CHART		
INTERNAL TEMPERATURES Rare : 50-60°C; Medium : 60-70°C; Well : 70-80°C		
MEAT	FAN OVEN	COOKING TIME
Beef	160-180°C	20-35 minutes per ½kg (1lb) and 20-35 minutes over
Beef, boned	160-180°C	25-35 minutes per ½kg (1lb) and 25-35 minutes over
Mutton and Lamb	160-180°C	25-35 minutes per ½kg (1lb) and 25-35 minutes over
Pork and veal	160-180°C	30-40 minutes per ½kg (1lb) and 30-40 minutes over
Ham	160-180°C	30-40 minutes per ½kg (1lb) and 30-40 minutes over
Chicken	160-180°C	15-20 minutes per ½kg (1lb) and 20 minutes over
Turkey and goose	160-180°C	15-20 minutes per ½kg (1lb) up to 3½kg (7lb) then 15 minutes per ½kg (1lb)
Duck	160-180°C	25-35 minutes per ½kg (1lb) and 25-35 minutes over
Pheasant	160-180°C	35-40 minutes per ½kg (1lb) and 35-40 minutes over
Rabbit	160-180°C	20 minutes per ½kg (1lb) and 20 minutes over
Potatoes with meat	160-180°C	according to size
Potatoes without meat	180-190°C	according to size

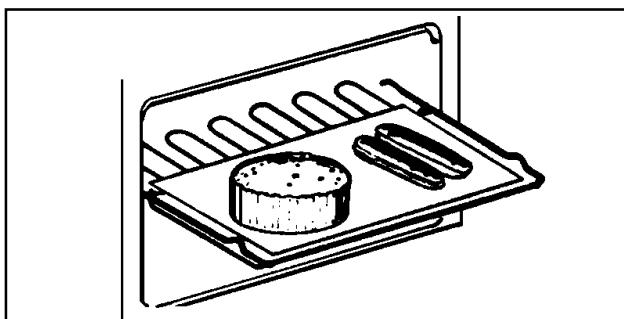

The roasting temperatures and times given in the chart should be adequate for most joints, but slight adjustments may be required to allow for personal requirements and the shape and texture of the meat. However, lower temperatures and longer cooking times are recommended for less tender cuts or larger joints.

Wrap joints in foil if preferred, for extra browning uncover for the last 30 - 60 min. cooking time.

## DEFROSTING

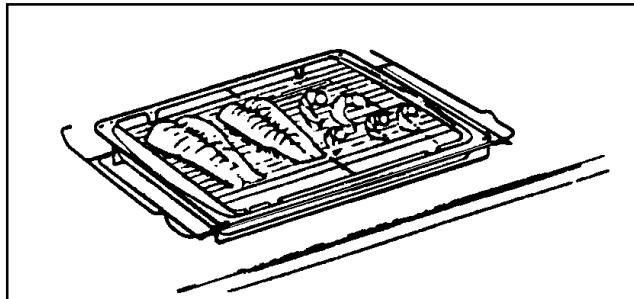

### USES OF DEFROST FEATURE

This fan oven function defrosts most foods faster than more conventional methods. It is particularly suitable for delicate frozen foods which are to be served cold e.g. cream filled gateaux, cakes covered with icings or frostings, cheesecakes, biscuits, scones etc.

It is preferable to thaw fish, meat and poultry slowly in the fridge. However, this process can be accelerated by using the defrost function.

Small or thin fish fillets, frozen peeled prawns, cubed or minced meat, liver, thin chops, steaks etc., can be thawed in 1 - 2 hours.

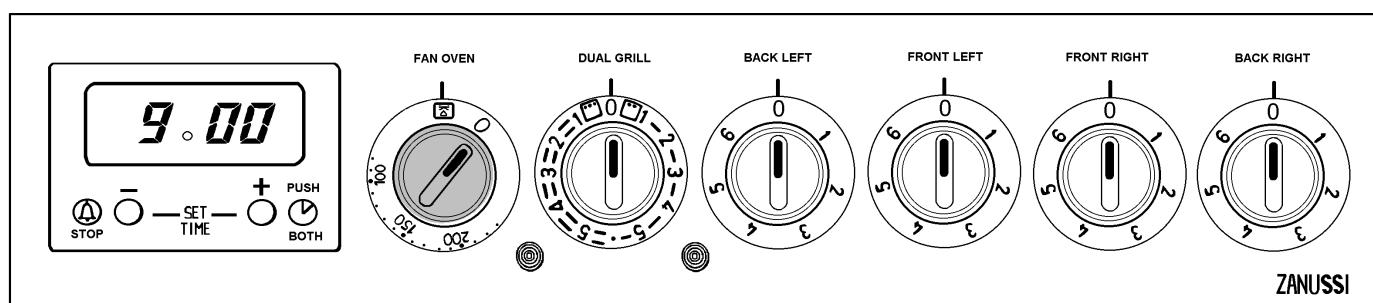

A 1kg/2 1/4 lb oven ready chicken will be thawed in approximately 5 hours. Remove the giblets as soon as possible during the thawing process.

Joints of meat up to 2kg/4 1/2 lb in weight can be thawed using the defrost function.

**ALL JOINTS OF MEAT AND POULTRY MUST BE THAWED THOROUGHLY BEFORE COOKING.**

**ALWAYS COOK THOROUGHLY IMMEDIATELY AFTER THAWING.**

### SELECTING DEFROST

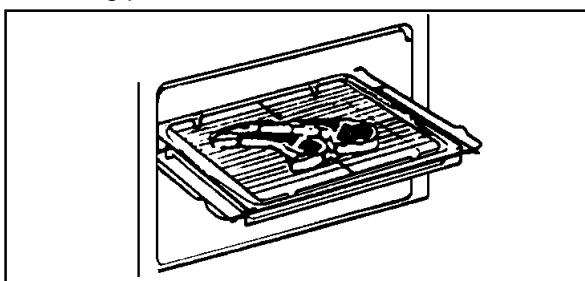

- Turn the fan oven temperature control to the defrost setting. 
- When defrost is selected, the oven indicator neon may come ON. It will stay ON until the oven reaches room temperature and then go OFF.
- It may cycle ON and OFF periodically during defrosting to maintain steady room temperature inside the oven.

### THINGS TO NOTE

Care must always be taken when handling foods in the home. Always follow the basic rules of food hygiene to prevent bacterial growth and cross contamination when defrosting, preparing, cooking, cooling and freezing foods.

### HINTS AND TIPS

- Place the frozen food in a single layer where possible and turn it over half way through the defrosting process.

- The actual speed of defrosting is influenced by room temperature. On warm days defrosting will be faster than on cooler days.
- DO NOT** leave food at room temperature once it is defrosted. Cook raw food immediately or store cooked food in the fridge.

## CARE AND CLEANING

**ALWAYS SWITCH OFF THE ELECTRICITY SUPPLY AT THE MAIN WALL SWITCH AND ALLOW THE COOKER TO COOL BEFORE CLEANING**

### CLEANING MATERIALS

Before using any cleaning materials on your cooker, check that they are suitable and that their use is recommended by the manufacturer.

Cleaners that contain bleach should NOT be used as they may dull the surface finishes. Harsh abrasives should also be avoided.

### CLEANING THE SEALED HOTPLATES AND HOTPLATE TRIMS

In order to maintain the appearance of your cooker's sealed hotplates and trims you are advised to use the recommended cleaning agents daily. If you do not allow spillages to burn on they will be much easier to clean off.

#### FOR NORMAL SOILAGE

Wipe over the hotplates and trims using a clean damp cloth, if necessary use a little washing up liquid, then switch to a low or medium setting for a few minutes to thoroughly dry.

#### FOR HEAVY SOILAGE

Remove heavily burnt in soilage with a patent razor in a holder with care. DO NOT use the edge of the scraper or a knife. Then soak the soiled area with hot water to which a little washing up liquid has been added. Further clean as below.

Use a clean damp cloth or scourer with a cream cleaner e.g. 'Jif' or a powder cleaner e.g. 'Ajax' on the hotplate and trims. Rinse off cleaning agents thoroughly. Dry as for normal soilage.

For more stubborn marks warm the hotplate on a low setting for approx. 6 - 8 mins. Clean the sealed plate with 'Ajax' powder cleaner, 'Jif' cream cleaner or a 'Brillo' pad. You may have to rub hard for several minutes.

Rinse off cleaning agents thoroughly with a damp cloth. Switch to a low or medium setting for a few minutes until the hotplate is thoroughly dry.

### CLEANING THE HOTPLATE TRIMS

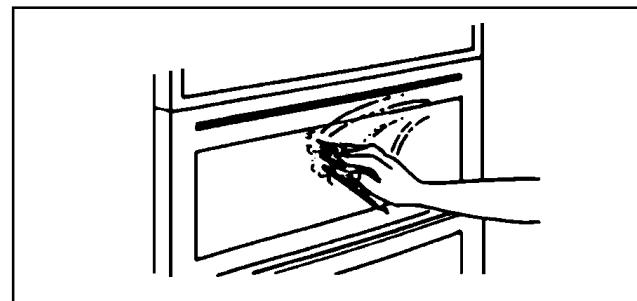

The stainless steel trims may become straw coloured during use. Using a proprietary stainless steel cleaner, e.g. 'Shiny Sinks' will help maintain a bright appearance. Alternatively a powder cleaner such as 'Bar Keepers Friend' may be used regularly.

### CLEANING THE VITREOUS ENAMEL

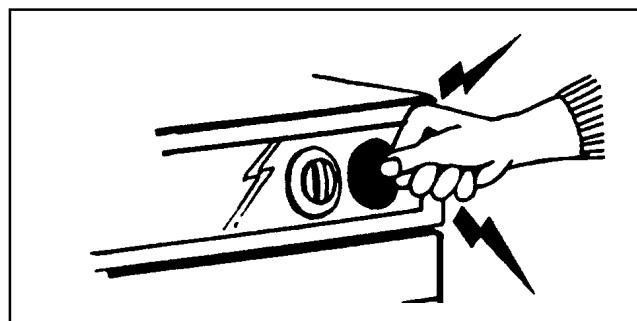

Use a clean damp cloth or scourer made for non-stick saucepans with 'Jif' cream cleaner.

### CLEANING THE OUTSIDE OF THE COOKER

DO NOT use abrasive cleaning materials or scourers on the outside of the cooker as some of the finishes are painted and damage may occur. Regularly wipe over the control panel, oven doors, handles and cooker sides using a soft cloth and warm water to which a little washing up liquid has been added.

DO NOT ATTEMPT TO REMOVE ANY OF THE CONTROL KNOBS FROM THE PANEL AS THIS MAY CAUSE DAMAGE AND IS A SAFETY HAZARD.

### CLEANING THE GRILL DEFLECTOR, GRILL PAN, GRILL PAN GRID AND OVEN SHELVES

All removable parts, except the grill pan handle can be washed in the dishwasher.

The grill pan and grill deflector may be cleaned using a soap impregnated steel wool pad. The grill pan grid and oven shelves should be cleaned using hot soapy water. Soaking first in soapy water will make cleaning easier.

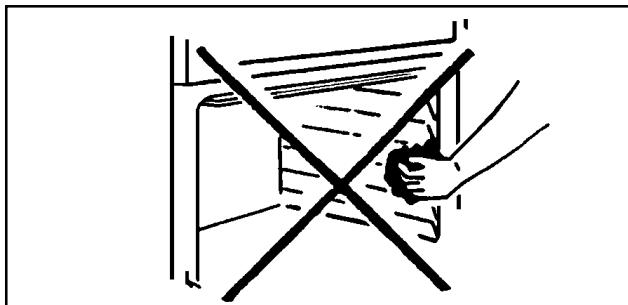

## CLEANING INSIDE THE OVEN AND GRILL COMPARTMENTS

The Stayclean surfaces in the main oven should not be cleaned manually.

The vitreous enamel base and sides in the grill compartment can be cleaned using normal oven cleaners or aerosol oven cleaners with care. Ensure that the manufacturers instructions are followed and that all parts are well rinsed afterwards.

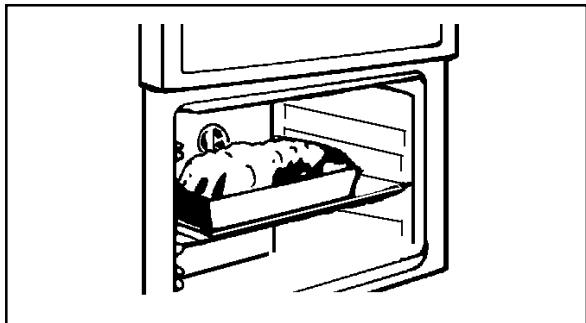

**Aerosol cleaners must not be used on the Stayclean main oven panels and must not come into contact with elements or the door seal as this may cause damage.**

See Hints and Tips for keeping oven soilage to a minimum.

## HINTS AND TIPS

- Manual cleaning of the Stayclean surface IS NOT recommended. Damage will occur if oven sprays or abrasives of any kind are used.
- The Stayclean surface destroys splashes of food and fats when the oven temperature is raised to around 220°C.
- It is a good idea to run the oven for an hour or two per week to ensure continued good performance from the Stayclean finish.
- Slight discolouration and polishing of the Stayclean surface may occur in time. This DOES NOT affect the Stayclean properties in any way.
- Follow the recommendations below to keep oven soilage to a minimum.
- Cook at the recommended temperatures. Higher temperatures during roasting will increase soilage. Try cooking at lower temperatures for an increased length of time, you will save energy and often the joint is more tender.
- Use minimal, if any, extra oil or fat when roasting meat, potatoes only require brushing with fat before cooking. Extra fat in the oven during roasting will increase splashing and soilage.
- It is NOT necessary to add water to the meat tin when roasting. The water and the fat juices from the joint create excessive splattering during cooking - even at normal temperatures, as well as causing condensation.
- Covering joints during cooking will also prevent splashing onto the interior surfaces. Removing the covering for the last 20-30 minutes will allow extra browning if required. Some large joints and turkeys especially benefit by this method of cooking, allowing the joint to cook through before the outside is overbrowned.

## SOMETHING NOT WORKING?

We strongly recommend that you carry out the following checks on your cooker before calling a Zanussi Service Engineer. It may be that the problem is a simple one which you can solve yourself without the expense of a service call.

If our Service Engineer finds that the problem is listed below you will be charged for the call whether or not the cooker is under guarantee.

### The cooker does not work at all:

- \* Check that the cooker has been wired in and is switched on at the wall.
- \* Check that the main cooker fuse is working.

### The hotplates and oven work but the grill does not:

- \* Check that you have carefully followed the instructions for the operation of the grill.

### The grill does not work:

- \* Check that the grill door is left open during grilling.

### The oven temperature is too high or low:

- \* Check that the recommended temperatures are being used (see page 19). Be prepared to adjust up or down by 10°C to achieve the results you want.
- \* Care should be taken when using an oven thermometer to check oven temperatures as they may be inaccurate.

The following factors should be considered.

- \* Ensure you purchase an accurate good quality instrument.
- \* The oven will cycle about a set temperature and will not be constant.

### If the oven is not cooking evenly or the side opening door will not stay open:

- \* Check that the cooker is level.
- \* Check that the recommended temperatures and shelf positions are being used.

### The fan oven is noisy:

- \* Check that the oven is level.
- \* Check that bakeware and shelves are not vibrating in contact with the back panel in the oven.

## SERVICE AND SPARE PARTS

### HELP US TO HELP YOU

Please determine your type of enquiry before writing or telephoning.

### SERVICE

It is a recommendation by the manufacturer that annual servicing of the product is done by the manufacturers approved service organisation.

Before calling out an Engineer, please ensure that you have read the details under the heading 'Something Not Working?' on page 24 and have the model number and purchase date to hand. You can contact your local Service Centre by telephoning:

**0870 5929929**

The telephone number and address for service is detailed in the enclosed Customer Care Booklet.

PLEASE NOTE that all enquiries concerning service should be addressed to your local Zanussi Service Force Centre.

Some Regional Electricity Companies are responsible for the servicing of cookers sold through their own retail outlets. For service contact your local Electricity Showroom.

### CUSTOMER CARE DEPARTMENT

**FOR GENERAL ENQUIRIES** concerning your Zanussi cooker or further information on Zanussi products, you are invited to contact our Customer Care Department by letter or telephone as follows:

Customer Care Department  
Zanussi Limited  
Zanussi House  
Hambridge Road  
Newbury  
Berkshire  
RG14 5EP

Tel: (01635) 521313

## GUARANTEE CONDITIONS

### Standard guarantee conditions

We, Zanussi Limited, undertake that if within 12 months of the date of the purchase this Zanussi appliance or any part thereof is proved to be defective by reason only of faulty workmanship or materials, we will, at our option repair or replace the same FREE OF CHARGE for labour, materials or carriage on condition that:

- The appliance has been correctly installed and used only on the electricity supply stated on the rating plate
- The appliance has been used for normal domestic purposes only, and in accordance with the manufacturer's instructions
- The appliance has not been serviced, maintained repaired, taken apart or tampered with by any person not authorised by us
- All service work under this guarantee must be undertaken by a Zanussi Service Force Centre.
- Any appliance or defective part replaced shall become the Company's property
- This guarantee is in addition to your statutory and other legal rights

Home visits are made between **8.30am** and **5.30pm** Monday to Friday. Visits may be available outside these hours in which case a **premium** will be charged.

### Exclusions

#### This guarantee does not cover:

- Damage or calls resulting from transportation, improper use or neglect, the replacement of any light bulbs or removable parts of glass or plastic
- Costs incurred for calls to put right an appliance which is improperly installed or calls to appliances outside the United Kingdom
- Appliances found to be in use within a commercial environment, plus those which are subject to rental agreements
- Products of Zanussi manufacture which are not marketed by Zanussi Limited

### European Guarantee

If you should move to another country within Europe then your guarantee moves with you to your new home subject to the following qualifications:

- The guarantee starts from the date you first purchased your product
- The guarantee is for the same period and to the same extent for labour and parts as exists in the new country of use for this brand or range of products
- This guarantee relates to you and cannot be transferred to another user
- Your new home is within the European Community (EC) or European Free Trade Area
- The product is installed and used in accordance with our instructions and is only used domestically, i.e. a normal household
- The product is installed taking into account regulations in your new country

Before you move please contact your nearest Customer Care centre, listed below, to give them details of your new home. They will then ensure that the local Service Organisation is aware of your move and able to look after you and your appliances.
